10.1.10 Configure Network Printing

In a busy office environment, maintaining the confidentiality of printed documents is crucial, especially for sensitive information. A director wants to share the HP Photosmart Plus printer connected to their computer. This will allow other employees to safely print sensitive information to a more private location.

In this lab, your task is to share the printer on the Office1 computer and then add the shared printer to the Office2 computer as follows:

- In Office1:
 - Share the **HP Photosmart Plus** printer using the **HP Photosmart Plus** share name.
 - Allow clients to render print jobs on their own computers.
- In Office2:
 - Add the shared **HP Photosmart Plus** printer (connected to Office1) to the list of available printers.
 - Make the **HP Photosmart Plus** printer the default printer.

Complete this lab as follows:

1. On the Office1 computer, share a printer.
 1. Right-click **Start** and then select **Settings**.
 2. Select **Bluetooth & devices**.
 3. Select **Printers & scanners**.
 4. Select **HP Photosmart Plus**.
 5. Select **Printer properties**.
 6. Select the **Sharing** tab.
 7. Select **Share this printer**.
 - Use the default share name **HP Photosmart Plus**.
 - Verify **Render print jobs on client computers** is checked.
 8. Select **OK**.
2. On Office2, add the shared HP Photosmart Plus printer.
 1. From the top navigation area, select **Floor 1 Overview**.
 2. Under Office 2, select **Office2**.
 3. Right-click **Start** and then select **Settings**.
 4. Select **Bluetooth & devices**.
 5. Select **Printers & scanners**.
 6. Select **Add device**.
 7. For *HP Photosmart Plus on Office1*, select **Add device**.
 8. Wait for the printer to install.
3. On Office2, configure the HP Photosmart Plus as the default printer.
 1. Select **HP Photosmart Plus on Office1**.
 2. Select **Set as default**.
