IT Labs

Prepared by Garrick White

Explore the Lab Interface

You have been hired as a network technician for a small corporate network. Today is your first day on the job, and you need to familiarize yourself with the network. In addition, a new employee will be working in Office 2, and you need to set up their computer.

In this lab, your task is to:

- Move from your starting location in the networking closet to Office 2.
- Add the monitor to Office 2.
- Use an HDMI cable to connect the monitor to the Office2 computer.
- Use an AC power cable to give the monitor power from the outlet.
- Add the keyboard and mouse to the workspace and plug them into the back of the computer.
- Turn on the monitor and the computer.
