IT Labs

Prepared by Garrick White

5.2.8 Connect Computers with a Switch

In this lab, you will design a small office/home office (SOHO) network using the network modeler:

1. Add the computers to the canvas
 1. In the tools tray, select the **End Devices** icon.
 2. Drag all three computers to the modeler canvas.
2. Add the switch to the canvas
 1. In the tools tray, select the **Switches** icon.
 2. Drag the switch to the modeler canvas.
3. Connect the computers to the switch
 1. In the tools tray, select the **Create Link** icon.
 2. Click on **Home-PC1** and select the **Ethernet** port.
 3. Click on the **Switch** and select an open port.
 4. Use the same process to connect the other two computers to the switch.
4. Add the router to the canvas
 1. In the tools tray, select the **Routers** icon.
 2. Drag the router to the modeler canvas.
5. Connect the switch to the router
 1. In the tools tray, make sure the **Create Link** icon is toggled on. If it isn't, click it.
 2. Use **Create Link** to connect the router to the switch.

Explanation

Complete this lab as follows:

1. Add the computers to the canvas
 1. In the tools tray, select the **End Devices** icon.
 2. Drag all three computers to the modeler canvas.
2. Add the switch to the canvas
 1. In the tools tray, select the **Switches** icon.
 2. Drag the switch to the modeler canvas.
3. Connect the computers to the switch
 1. In the tools tray, select the **Create Link** icon.
 2. Click on **Home-PC1** and select the **Ethernet** port.
 3. Click on the **Switch** and select an open port.
 4. Click on **Home-PC2** and select the **Ethernet** port.
 5. Click on the switch and select an open port.
 6. Click on **Home-Laptop** and select the **Ethernet** port.
 7. Click on the switch and select an open port.
4. Add the router to the canvas
 1. In the tools tray, select the **Routers** icon.
 2. Drag the router to the modeler canvas.
5. Connect the switch to the router
 1. In the tools tray, make sure the **Create Link** icon is toggled on. If it isn't, click it.
 2. Click on the **Router** and select **Port 0**.
 3. Click on the switch and select an open port.
