5.4.14 SOHO Wi-Fi Configuration Settings

You are working on a small office/home office (SOHO) network. You recently created a wireless network to allow the owner's laptop and mobile devices to make a connection to the wired network and the internet. Now, you want to customize some of the wireless and security settings.

In this lab, your task is to:

- Access the TRENDnet wireless access point from the Home-PC computer.
 - From Google Chrome, use **192.168.0.254** as the connection URL.
 - Username: **admin**
 - Password: **password**
- Change the router's administrator credentials to the following:
 - Username: **TheBoss**
 - Password: **Super\$ecur3**
- Set the Wireless Mode to **802.11 g/n mixed mode**.
- Configure the router to automatically choose a wireless channel.

Complete this lab as follows:

1. Access the TRENDnet wireless access point configuration tool.
 1. Open **Google Chrome**.
 2. In the URL field, type **192.168.0.254** and press **Enter**.
 3. In the Username field, enter **admin**.
 4. In the Password field, enter **password**.
 5. Check **Remember my credentials**.
 6. Select **OK**.
2. Change the settings on the wireless access point.
 1. From the left menu, select **Wireless**.
 2. Select **Basic**.
 3. Change the Wireless Mode to **802.11 g/n mixed mode**.
 4. Change the Frequency(Channel) to **AutoSelect**.
 5. Select **Apply**.
 6. Select **OK**.
3. Change the wireless access point's administrator authentication credentials from their defaults.
 1. From the left, select **Administrator**.
 2. Select **Management**.
 3. In the Account field, use **TheBoss** as the new username.
 4. In the Password field, use **Super\$ecur3**.
 5. For the Administrator Settings pane, select **Apply**.
 6. Close Google Chrome.
