IT Labs

Prepared by Garrick White

8.1.3 Explore Virtualization

In this lab, you'll practice running virtual machines. Your computer has three creatively-named virtual machines installed on it:

- Virtual Machine 1
- Virtual Machine 2
- Virtual Machine 3

To run a virtual machine, use **Hyper-V Manager**, which is open by default. On the left side of the application, select **ITADMIN** to view the virtual machines. Double-click a virtual machine to launch it.

One of the advantages of using virtual machines is the ability to run multiple operating systems simultaneously on a single physical computer. For example, you may wish to run older operating systems on a VM to test the backward compatibility of an application. Another use is to run a server OS on a client system.

To complete this lab, use the virtual machines to answer the questions.

To view a computer's operating system version:

1. Open the Settings app.
2. Select **System** (if there is no System option, skip this step).
3. Select **About**.
4. Scroll down to view the Operating System information.

Explanation

Complete this lab as follows:

1. Check the operating system of the base computer.
 1. From the taskbar, select **Start**.
 2. Select **Settings**.
 3. Under System, scroll down and select **About**.
 4. Under Windows specifications, use the Edition to answer Question 1.
 5. Close the settings app.
2. Launch a virtual machine and check its OS:
Perform the following steps for each of the three virtual machines
 1. In Hyper-V Manager, select **ITADMIN** on the left side of the application.
 2. Double-click the VM you want to launch.
 3. In the Virtual Machine Connection window, select the **Start** button.
 4. Select **Settings** (the gear icon).
 5. Select **System**.
 6. On the left side of the screen, scroll down and select **About**.
 7. Scroll down to Windows Specifications and use the Edition to answer the question that corresponds with the VM you have open.
 8. Close the Virtual Machine Connection window.

Lab Questions

Q1 What operating system is running on ITAdmin? [Windows 11 Pro](#)

Q2 What operating system is running on Virtual Machine 1? [Windows 10 Enterprise](#)

Q3 What operating system is running on Virtual Machine 2? [Windows Server 2019 Datacenter](#)

Q4 What operating system is running on Virtual Machine 3? [Windows Server 2022 Datacenter](#)
