IT Labs

Prepared by Garrick White

8.2.4 Use the Azure Interface

You are the network administrator for your company. You have decided to begin the configuration of Azure to help manage your network. You need to create a resource group to organize your Azure assets.

In this lab, your task is to create a resource group using the following information:

- Azure portal:
 - Site: **<https://portal.azure.com>**
- Project details:
 - Subscription name: **CorpNet Production**
 - Resource group name: **CorpNetCloud**
- Resource details:
 - Region: **(US) West US2**

Use Chrome to access the Azure portal. Resource groups are found in the Navigation section of the portal.

Complete this lab as follows:

1. Access the Azure portal.
 1. From the taskbar, select **Google Chrome**.
 2. In the browser's address field, type **https://portal.azure.com** and press **Enter**.
 3. Maximize the window for better viewing.
2. Create a resource group.
 1. Under *Navigate*, select **Resource groups**.
 2. From the *Resource groups* menu bar, select **Create**.
 3. Configure the *Project details* as follows:
 - Subscription: **CorpNet Production**
 - Resource group (type in manually): **CorpNetCloud**
 - Resource details: **(US) West US2**
 4. From the bottom menu bar, select **Review + create** to validate the configuration.
 5. Select **Create**.
 6. From the Resource groups page, select **CorpNetCloud**.
 7. Review the options of the created resource group.
