IT Labs

Prepared by Garrick White

9.1.4 Manage Mobile Devices

You are the IT administrator for a small corporate network. The CFO, Arlene Kimbly, has just purchased an iPad, which allows her to manage some of her tasks while away from her desk. Arlene would like to transfer some data from her iPad to her laptop using Bluetooth. Arlene must also be connected to the wireless network, **CorpNet**, and the company's VPN.

In this lab, your task is to:

- Connect Arlene's iPad to the CorpNet Wi-Fi.
 - Network: **CorpNet**
 - Password: **@CorpNetWeRSecure!&**
- Enable Bluetooth on Arlene's iPad.
- Configure VPN settings on the iPad for future use. *Do not connect to the VPN.*
 - Protocol: **PPTP**
 - Description: **CorpNet VPN**
 - Server: **198.10.20.12**
 - Account: **akimbly**

Wi-Fi, Bluetooth, and VPN settings are located in the Settings app. VPN settings are under the General heading.

Explanation

Complete this lab as follows:

1. Enable Wi-Fi and connect the iPad to the CorpNet Wi-Fi.
 1. On Arlene's iPad, select **Settings**.
 2. From the left menu, select **Wi-Fi**.
 3. From the right pane, slide the **Wi-Fi button** to the on position.
 4. From the right, under NETWORKS, select **CorpNet**.
 5. In the Password field, enter **@CorpNetWeRSecure!&** as the password.
 6. Select **Join**.
2. Turn on Bluetooth.
 1. From the Settings pane, select **Bluetooth**.
 2. From the right pane, slide the **Bluetooth button** to the **on** position.
3. Configure VPN settings on the iPad.
 1. From the Settings pane, select **General**.
 2. From the right pane, select **VPN**.
 3. Select **Add VPN Configuration**.
 4. Select **PPTP**.
 5. Configure the VPN settings.
 - Description: **CorpNet VPN**
 - Server: **198.10.20.12**
 - Account: **akimbly**
 6. Select **Save**.
