

CompTIA A+ Core 1 Playbook

IT Labs

Prepared by Garrick White

9.5 Mobile Hardware Support

You are a junior IT professional at a small startup company. Your manager has asked you to prepare the marketing director's iPad and notebook computer for an upcoming conference that she is attending. While working on the notebook computer, you notice the integrated Wi-Fi adapter is not functioning.

Complete the following on the iPad:

- Turn off airplane mode and connect the iPad to the CorpNet wireless network.
 - Airplane Mode: **Disabled**
 - Passphrase: **@CorpNetWeRSecure!&**
- Turn off Bluetooth.
- Turn on passcode.
 - Current passcode: **1542**
- Configure the iPad to require a passcode after **15 minutes** of being idle.
- Configure the iPad to erase all data after **10** failed passcode attempts.
- Configure VPN settings on the iPad for future use:
 - VPN type: **PPTP**
 - Description: **Office2VPN**
 - Server: **198.28.56.110**
 - Account: **mbrown**
- Leave the password field blank and all other settings as default.

Complete the following on the Office2-Lap Computer:

- On the laptop, install the fastest USB wireless adapter from the Inventory.
- On the laptop, configure power-saving options to increase battery life as follows:

- Customize the plan to turn off the screen after **10 minutes** when on battery power.
- Customize the plan to put the computer to sleep after **30 minutes** when plugged in.
- Use the **Best power efficiency** plan.

Explanation

Complete this lab as follows:

On the iPad:

1. Turn off airplane mode and connect the iPad to the CorpNet wireless network.
 1. Select the button at the bottom of the iPad to view the screen.
 2. Select **Settings**.
 3. From the left pane, slide the **Airplane Mode** button to the off position.
 4. Select **Wi-Fi**.
 5. From the right, slide the **Wi-Fi** button to the on position.
 6. Under NETWORKS, select **CorpNet**.
 7. In the Password field, enter **@CorpNetWeRSecure!&** and then select **Join**.
2. Turn off Bluetooth.
 1. From the Settings pane, select **Bluetooth**.
 2. From the right pane, slide the **Bluetooth** button to the off position.
3. Turn on passcode.
 1. From the Settings pane, select **Touch ID & Passcode**.
 2. Select **Turn Passcode On**.
 3. Enter **1542** and select **Next**.
 4. Re-enter **1542** and select **Done**.
4. Configure the iPad to require a passcode after 15 minutes of being idle.
 1. Select **Require Passcode**.
 2. Select **After 15 minutes**.
 3. At the top, select **Passcode Lock**.
5. Configure the iPad to erase all data after 10 failed passcode attempts.
 1. From the Touch ID & Passcode pane, slide the **Erase Data button** to the on position.
 2. Select **Enable**.
6. Configure VPN settings on the iPad for future use.

1. From the Settings pane, select **General**.
2. From the right pane, select **VPN**.
3. Select **Add VPN Configuration**.
4. Select **PPTP**.
5. Configure the VPN settings.
 - Description: **Office2VPN**
 - Server: **198.28.56.110**
 - Account: **mbrown**
6. Select **Save**.

On the Office2-Lap Computer:

1. Install the fastest USB wireless adapter.
 1. From the top left, select **Floor 1 Overview**, then select **Hardware** under Office 2.
 2. Switch to the **Back** view of the laptop.
 3. Under Inventory, expand **Networking Devices**.
 4. Drag the **802.11a/b/g/n/ac USB Adapter** to an open USB port on the laptop. You may need to hover over each item to view its full description.
2. Configure power-saving options.
 1. Switch to the **Front** view of the laptop and click on the screen.
 2. Right-click **Start** and select **Settings**.
 3. From the right, select **Power & battery**.
 4. Select **Screen and sleep**.
 5. For *On battery power, turn off my screen after*, use the dropdown to select **10 minutes**.
 6. For *When plugged in, put my device to sleep after*, use the dropdown to select **30 minutes**.
 7. For *Power mode*, use the dropdown to select **Best power efficiency**.
 8. Close the Settings app.
